   ii. less than $5M in capital raised; and
   iii. company has fewer than 50 employees.

II. OTHER LICENSES AND USE OF THE INVENTION

Also, identify, to the best of Applicant's knowledge, the extent to which the invention for which a license is sought is being practiced by private industry or Government, or is otherwise available commercially.

III. PROPOSED LICENSE TERMS

Include definitions of licensed products, processes or methods; geographic territories; duration of license; claims (if known) of patent/patent application under which the proposed licensed technology would fall; and other terms for which you wish to make a proposal at this time.

IV. RESEARCH, DEVELOPMENT AND MARKETING PLAN

Include description of product(s) or method(s) to be developed with the licensed technology and, for each product or method to be developed, a description of expected product research and development programs, including (where relevant) major preclinical, clinical, regulatory, manufacturing and marketing stages; monetary and personnel commitments for each development stage; and the

A detailed statement as to 1) why Federal and public interests will be best served by exclusive licensing of this invention; 2) why expeditious practical application of the invention is unlikely to occur under a nonexclusive license; 3) why the exclusive licensing of this invention is a reasonable and necessary incentive to attract investments of risk capital; 4) why the exclusive licensing of this invention will not tend substantially to lessen competition or result in undue market concentration; and 5) why the proposed license terms and scope of exclusivity are not greater than reasonably necessary.
